### Chief Complaint

1. *Persistent cough and shortness of breath.*
2. *Abdominal pain and nausea after eating.*

---

### Consultation Summary

- Patient presents with a persistent cough and mild shortness of breath. No fever or chills. Chest auscultation reveals mild wheezing. Suspected upper respiratory tract infection. Prescribed cough syrup and inhaler. Advised rest and steam inhalation.
- Complaints of abdominal pain and nausea post-meal. No vomiting or fever. Abdominal examination shows mild tenderness in the epigastric region. Suspected gastritis. Advised dietary modifications and prescribed antacid.
